Charlie Castle, Program Manager
Technical Support Section
US EPA Region V 5HR-12
230 South Dearborn Street
Chicago IL 60604

Dear Mr. Castle,

This letter serves three purposes. The first is to identify sites on CERCLIS that are erroneously categorized as NFA according to our last printout. As per our phone conversation of 2/22/89, this letter serves to identify those sites so that the NFA classification can be changed. These sites include:

WID980610786 New Holstein Municipal Landfill: in 1985 WDNR requested FIT to install wells to determine groundwater releases; letter from EPA indicates that FIT will not be drilling at this site because it scores high enough without drilling - State now recommends this site as a candidate LSI site.

WID098547854 Metro Landfill and Development: The WDNR is completing the SSI for this site at this time; follow up status to be determined.

WID980610208 Ripon City Landfill (HWY 23): The WDNR is completing the SSI for this site at this time; follow up status to be determined.

WID057163941 Theim Corp. Plant Property: This site is in WDNR FY89 Cooperative Agreement for EPI activities.

The second purpose of this letter is to remind you of our past request that you return to us the following site inspection reports so that we may resubmit them to you in the standard format we have agreed to. We will need to receive these reports before March 1, 1989 at the very latest, or we will not have the staff available to resubmit them, as our field season begins at that time.

WID981101199 Junkers Landfill
WID006126213 Old Wausau LandfillMarathon Electric
WID981000979 Minocqua Well Contamination
WID981539323 Minocqua Dry Cleaners

US EPA RECORDS CENTER REGION 5

399747

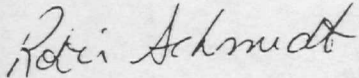

WID003982709 Precision Metalsmiths
WID980610638 New Wheeler Pit
WID981188303 Van Handel Landfill
WID981095540 Connors Forest Ind Pit #5

Lastly, the following site inspection reports were submitted to you more than 30 days ago and we have not yet received comments from you. We would like to finalize as many site inspection reports in as timely a manner as possible, as the information is still fresh for our field staff and they have not yet started the next field season.

WID980997456 Hardwood Range
WIT560010118 Better Brite Chrome
WID063489603 Barrett Landfill
WID006070031 Gehl Co

Thank you for your assistance in these matters. I hope that this will help expedite finalizing a large number of SSI Reports so that we may begin our field season with our past commitments met.

Sincerely,

Robin Schmidt
